

## Version History and Issues & Solutions

### DTS Encoder 1.0.0.187

---

The following issues have been fixed in version 1.0.0.187

Issue ID	Description
19773	No GUI of DTS Encoder shows up when executing an export in DTS format. Instead the application crashes.
19250	DTS encoder disables export options for all other formats.
19486	The DTS encoder doesn't feature the "use .cpt" option anymore.

The following table describes issues you may encounter using this software as well as possible workarounds.

Issue ID	Issue	Solution
12790 17070 19505	Exporting "as wave file" creates stereo wave files with ".dts" extension instead of ".wav".	After export, manually rename the file extension to ".wav". <u>PC</u> : If file extensions are not visible (hidden) on your system, locate exported file and right-click it to open context menu. Select "Properties" and replace ".dts" with ".wav" and click "ok". <u>MAC</u> : localize exported file and ctrl+click on it. Select "Get Info" and change the file extension ".dts" to ".wav". Press enter and confirm with "Use .wav".
